

Absorb More, Achieve More With Our Breakthrough in B Vitamin Absorption

RiboVite™: A patent-pending synergistic combination of D-Ribose and B Vitamins that revolutionizes the oral bioavailability and cellular activation of B Vitamins. Traditionally, B Vitamins often have poor oral bioavailability; even when absorbed, these vitamins require phosphorylation within the cell to become active — a process that's not always efficient. This means the body may not fully utilize a significant amount of the B Vitamins you consume.

Why is bioavailability important? Oral bioavailability is one of the essential properties in product design and development. A high oral bioavailability reduces the amount of an administered ingredient necessary to achieve an effect.

RiboVite Has Changed the B Vitamin Experience! Benefits Include:

- Increases B-vitamin activity inside the cell for maximum effect.
- Improves co-enzyme activity in tissues supporting energy metabolism, nerve function and better well-being.
- Enhances oxidative metabolism.

Additional Facts:

- PreClinically tested
- Patent pending
- Clean label
- Safe, side-effect free
- GRAS
- Suitable for pre-mixed powders, tablets, gummies, beverages and much more.

Discover how RiboVite can elevate your next product with B Vitamins and give it a competitive edge. Contact us to learn more about our clinical studies, obtain samples, and discuss how to integrate RiboVite into your next formulation.

About Bioenergy Life Science, Inc. (BLS)

BLS is reimagining ingredients for a healthier life. We merge science and healthy living needs to advance dietary supplements, functional foods, beverages, and personal care products naturally. Our range of naturally occurring functional ingredients are backed by 30+ years of science and aim to help people live healthier lives without compromising quality and taste. Imagine functional ingredients that support popular trends such as plant-based, cognitive health, healthy aging, digestion, and cellular health. We are here to bring those dreams to reality through our versatile ingredients.
